

Screening Options for Recreational Vehicles and Boats

Architecture Review

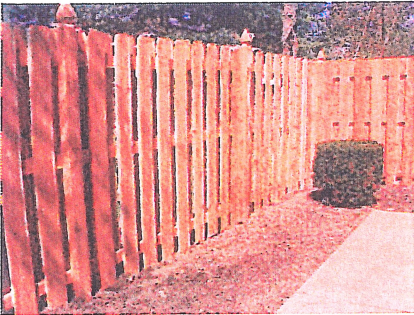

All screening whether it be structural, or land scaping must be approved through the architecture review process.

Screening Options

Structural

The use of constructed buildings or sheds.

Fencing

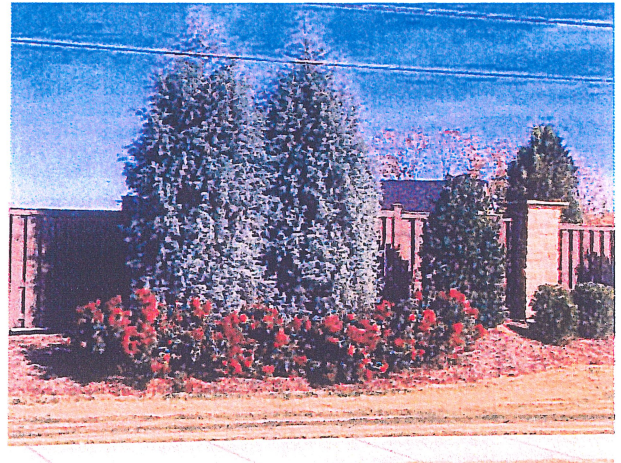

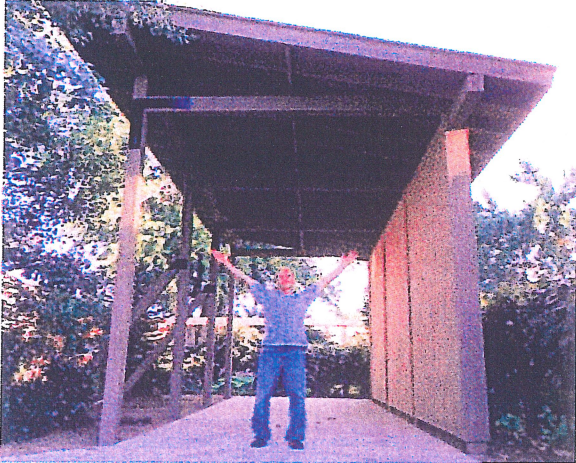

Different styles of fencing may also be used to provide sight obstruction.

Land Scaping

The use of trees, shrubs, and other plants.

Examples

Took about an hour to put on with 2 people (instructions said 5 minutes without ladders). Next time we will duct tape the rain gutters (sharp edges) and put a plastic bag over the antenna to allow the cover to more easily slide over the top. Once it was on it was easy to fasten and tighten down. You also need 2, 8-10 ft poles to lift the cover from each side as you walk it back to eliminate the use of a ladder. Must be put on with little or no wind blowing. We had our first major
